

CEPRO Robusto

Highlights

The basic frame of the tubular frame 093 is 2100x2100mm and has two swivel arms with a length of 1100mm. In combination with laservision laser safety curtains it is very easy to build a laser safe area. The frame has two outriggers with stable castors and is therefore easy to move. Due to the low construction depth, a space-saving installation is possible.

Articlenumber: 093

GTIN: 4050369008854

Unit: 1 Stück
