

CEPRO Robusto

Highlights

The basic frame of the tubular frame 095 is 2100x2100mm and has a swivel arm with a length of 700mm. In combination with laservision laser safety curtains it is very easy to build a laser safe area. The frame has two outriggers with stable castors and is therefore easy to move. Due to the low construction depth, a space-saving installation is possible.

Articlenumber: 095

GTIN: 4050369008878

Unit: 1 Stück

Weight incl. packaging 24,00 kg

Weight excl. packaging: 22,75 kg
